

## Fusion EasyBase Assembly

**Important! Read the directions and study the pictures—it makes all the difference.**

*Matthew Burak*

**Everything you need to build your base is supplied.**

4 table legs\*

4 table aprons

4 corner blocks

8 mounting bolts

8 washers

Allen (hex) wrench

**No additional tools required!**

\* Your legs and aprons may be a different size or style than shown in the photo—not to worry, the assembly is the same.

## 1: Loosely attach corner blocks to the legs.

A and B: Align the mounting block and thread the bolt (with washer) into the threaded rivets at the top of the leg.

C: Do not tighten!  
There should be a gap between the legs and the corner blocks, as shown.

## 2: Lay out the aprons.

**Assemble your base upside down on a smooth, flat surface that is larger than the table base you're building.**

Be sure the holes in the aprons for mounting the top are to the inside of the base, in the down position.

## 3: Install the legs.

Slide the notches at the top of the leg into the tabs on the apron—the corner blocks should fit into the notches on the aprons.

Correct alignment

You're almost done!

#### 4: Tighten the leg.

Using the supplied wrench, tighten each bolt until it stops turning and the wrench handle begins to spring back. Repeat steps 3 and 4 for the remaining legs.

#### 5: Check the joinery.

Turn your table right-side up and carefully inspect the fit at each corner. If need be, fine-tune the fit by loosening the bolts and realigning the leg and aprons.

Check the fit at each corner.
